onecom

Samsung Enterprise Edition

Less Work. More Business

For modern businesses, enabling productivity within your workforce can be a challenging prospect with employees working from a wide range of geographical locations and networks.

Sufficient data security, device management and contingency planning becomes near impossible without the usage of the right devices, applications and support services to empower staff with seamless and problem-free communications.
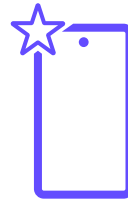

Thankfully, Samsung and Onecom are able to offer a suite of services to help you easily manage your devices.

What is Enterprise Edition?

Enterprise Edition are specialised versions of popular Samsung devices like the S21, or Xcover Pro, with additional software and services designed for business users and their dedicated IT teams.

In combination with your Onecom dedicated account manager and support team, you'll benefit from a single, simplified service for your telecoms that utilises the best of Samsung and Onecom's joint partnership.
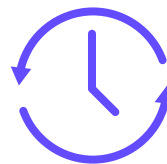

More Choice

A wide range of Industry-leading mobile devices.

Greater Control

Easily deploy, manage, and secure devices.

Increased Reliability

Ensure device availability over a longer period of time.

Improved Simplicity

Configure, update, test and deploy technology easily and remotely.

Why Onecom and Samsung?

We work in partnership with Samsung to find our customers the best devices for their needs. Having a direct relationship with both Samsung and our customers, allows us to provide quality solutions for your mobile requirements, no matter what industry you're in.

Access to consultants and expertise to help manage and support your technology throughout your transformation journey.

Onecom can deliver best-of-breed cloud services, unified communications and 24/7 managed service, creating a single technology eco-system for your Samsung devices and IT systems.

"Onecom is a highly-valued Samsung partner whose teams are renowned for innovative solutions and excellence in product knowledge."

- Joe Walsh, Samsung

Take Control of your Device Strategy

Onecom's unique relationship with Samsung gives us best access to the devices, software and services you need to effectively run your business.

Whether that's the latest rugged handsets, enhanced support services, or powerful smartphones. Samsung and Onecom will take the time to understand your business, and recommend the best technology to support your digital roadmap.
